DELAYED HYPERSENSITIVITY: SPECIFIC CELL-MEDIATED IMMUNITY

Scientific Editor . . . . . J. L. TURK

*

ASPECTS OF MEDICAL VIROLOGY

Scientific Editor . . . . . A. P. WATERSON

*

INTESTINAL ABSORPTION

Scientific Editor . . . . . D. H. SMYTH

MEDICAL DEPARTMENT · THE BRITISH COUNCIL · 65 DAVIES STREET · LONDON · W.1

CONTENTS OF VOLUME TWENTY-THREE

NUMBER 1. *Delayed Hypersensitivity: Specific Cell-Mediated Immunity*

Scientific Editor: J. L. TURK

		PAGE
Introduction	*P. G. H. Gell*	1
Cytology of the induction of hypersensitivity	*J. L. Turk*	3
The role of the macrophage in delayed hypersensitivity	*D. C. Dumonde*	9
Macrophage cytophilic antibodies and delayed hypersensitivity	*D. S. Nelson & S. V. Boyden*	15
Delayed hypersensitivity and desensitization to chemical haptens: antigenic specificity of delayed hypersensitivity	*P. G. H. Gell & R. W. Wolstencroft*	21
Antigen-mediated depression of delayed hypersensitivity	*Geoffrey L. Asherson*	24
The role of antibody in delayed hypersensitivity	*A. Szenberg & Noel L. Warner*	30
Histology of allergic inflammation	*W. G. Spector*	35
Role of adjuvants in the production of delayed hypersensitivity	*R. G. White*	39
Possible pharmacological mediators of delayed hypersensitivity	*H. O. Schild & D. A. Willoughby*	46
The relationship of delayed hypersensitivity to acquired cellular resistance	*G. B. Mackaness*	52
Cellular immunity and the homograft reaction	*L. Brent & P. B. Medawar*	55
Cell-mediated immune responses to virus infections and virus-induced tumours	*A. C. Allison*	60
Delayed hypersensitivity in auto-immune disease	*I. M. Roitt & Deborah Doniach*	66
Delayed hypersensitivity and polysaccharide-containing antigens	*E. J. Holborow & G. Loewi*	72
Tuberculin reaction in tuberculosis	*Francis O'Grady*	76
Lepromin and Kveim antigen reactivity in man, and their relation to tuberculin reactivity	*P. D'Arcy Hart & R. J. W. Rees*	80
Cellular resistance to tumours	*P. Alexander & G. Hamilton Fairley*	86
Cell-mediated immunity—general perspectives	*J. H. Humphrey*	93
Notes on Contributors		98
Book Reviews		101

NUMBER 2. *Aspects of Medical Virology*

Scientific Editor: A. P. WATERSON

		PAGE
Introduction	*Michael Stoker*	105
Interferons and other cell products influencing viral multiplication	*D. C. Burke & J. J. Skehel*	109
Chemotherapy of viral infections	*G. Appleyard*	114
Smallpox and vaccinia	*H. S. Bedson & K. R. Dumbell*	119
Common colds and related diseases	*D. A. J. Tyrrell*	124
Morphological and antigenic sub-units of viruses	*H. G. Pereira & R. C. Valentine*	129
Scrapie and its wider implications	*J. T. Stamp*	133
Virulence in Newcastle disease virus: a preliminary study	*A. P. Waterson, T. H. Pennington & W. H. Allan*	138
Recent advances in the study of viral oncogenesis	*Ian Macpherson*	144
Reoviruses	*N. F. Stanley*	150
Genetic analysis of animal viruses: new approaches and new vistas	*P. D. Cooper*	155
Base doublet frequency patterns in the nucleic acid and evolution of viruses	*J. H. Subak-Sharpe*	161
Non-structural proteins of viruses of vertebrates	*P. Wildy, D. H. Watson & W. I. H. Shedden*	169
Viral multiplication in vitro in relation to pathogenesis	*F. Kingsley Sanders*	175
Defective and delayed myxovirus infections	*K. B. Fraser*	178
Rubella	*K. McCarthy & C. H. Taylor-Robinson*	185
Replication of small RNA viruses	*E. M. Martin*	192
Notes on Contributors		198
Book Reviews		201

NUMBER 3. *Intestinal Absorption*

Scientific Editor: D. H. SMYTH

		PAGE
Introduction	*D. H. Smyth*	205
Techniques, terminology and parameters in intestinal absorption	*R. J. Levin*	209
Methods for studies of intestinal absorption in man	*H. L. Duthie*	213
Histology and cytochemistry of the cells of the small intestine, in relation to absorption	*A. G. E. Pearse & E. O. Riecken*	217
Ultrastructure of jejunal surface epithelium in untreated idiopathic steatorrhoea	*Margot Shiner*	223
The turnover of the epithelium of the small intestine	*Brian Creamer*	226
Membrane transport in relation to intestinal absorption	*D. H. Smyth & R. Whittam*	231
Absorption of carbohydrates	*H. Newey*	236
Absorption of proteins	*R. B. Fisher*	241
Absorption of fats	*A. M. Dawson*	247
Salt and water absorption by the intestinal tract	*D. S. Parsons*	252
Absorption of water-soluble vitamins	*D. M. Matthews*	258
The intestinal mucosa and iron absorption	*Sheila T. Callender*	263
Electrical changes in relation to transport	*R. J. C. Barry*	266
Inhibition of intestinal absorption	*P. A. Sanford*	270
Compensatory changes in intestinal absorption	*R. Hermon Dowling*	275
Hereditary abnormalities of intestinal absorption	*M. D. Milne*	279
Relationship of the intestinal bacterial flora to absorption	*Soad Tabaqchali & C. C. Booth*	285
Notes on Contributors		291
Book Reviews		293

INDEX TO VOLUME TWENTY-THREE

Names printed in capitals are those of authors who have contributed papers. Titles of books are printed in italics.

A

Adenine, in nucleic acid of viruses, 161
Adenosine triphosphatase, activity in membrane transport, 234
Adenoviruses, cytopathic effects, 146
—— structure, 130
Adjuvants, microbial, in delayed hypersensitivity, 39
—— role in production of delayed hypersensitivity, 39
A-γ-globulinaemia, intestinal malabsorption in, 281
Alastrim, differentiation from variola major, 120
ALEXANDER, P. & FAIRLEY, G. H.: Cellular resistance to tumours, 86
Alkalosis, congenital, 282
ALLAN, W. H., *see* WATERSON, A. P., 138
ALLISON, A. C.: Cell-mediated immune responses to virus infections and virus-induced tumours, 60
Amantadine, inhibitory effect on viral multiplication, 114
Amino acids, absorption from intestine, 242
—— —— intestinal absorption, 231
—— —— —— —— hereditary disorders, 280
Anaemia: *The stomach and anaemia*, 293
Andrewes, C. H.: *The natural history of viruses*, 204
Antibody, cell-bound, role in hypersensitivity, 11
—— cytophilic, characteristics, 15
—— —— relationship to delayed hypersensitivity, 18
—— formation, induction, 30
—— role in delayed hypersensitivity, 30
Antigens, viral, 129
APPLEYARD, G.: Chemotherapy of viral infections, 114
Arboviruses, genetics, 159
Argentaffin cells, 220
Ascorbic acid, intestinal absorption, 261
ASHERSON, G. L.: Antigen-mediated depression of delayed hypersensitivity, 24
Auto-immune disease, delayed hypersensitivity in, 66
—— —— experimental, 27

B

BARRY, R. J. C.: Electrical changes in relation to transport, 266
Base doublet frequency patterns in nucleic acid of viruses, 161
BCG vaccination, effect on lepromin reactivity, 84
BEDSON, H. S. & DUMBELL, K. R.: Smallpox and vaccinia, 119
Bell, E. J., *see* Grist, N. R., 202
Bile salts, role in fat absorption, 247
Biographical notes on contributors, 98, 198, 291
Biotin, intestinal absorption, 261
Blood-group substances, delayed hypersensitivity to, 73
Book reviews, 101, 201, 293
BOOTH, C. C., *see* TABAQCHALI, S., 285
BOYDEN, S. V., *see* NELSON, D. S., 15
BRENT, L. & MEDAWAR, P. B.: Cellular immunity and the homograft reaction, 55
BURKE, D. C. & SKEHEL, J. J.: Interferons and other cell products influencing viral multiplication, 109
Butler, J. A. V.: *The life of the cell: its nature, origin and development*, 204

C

CALLENDER, S. T.: The intestinal mucosa and iron absorption, 263
Campbell, P. N. & Sargent, J. R. (editors): *Techniques in protein synthesis*, vol. 1, 294
Carbohydrates, intestinal absorption, 236
—— —— —— cellular level, 238
—— —— —— disorders, 279
Cells, resistance, acquired, to infection, 52
—— *The life of the cell: its nature, origin and development*, 204
Chloridorrhoea, congenital, 282
Chlorine, intestinal absorption, 254
Chondromucoprotein, delayed hypersensitivity to, 73
Choriomeningitis, lymphocytic, virus of, immune response, 63
Chylomicron formation, 249

INDEX TO VOLUME TWENTY-THREE

Cockcroft, Sir J. (editor): *The organization of research establishments*, 101
Coeliac disease, 281
Colds, common, and related diseases, 124
Common colds and related diseases, 202
Contributors, biographical notes on, 98, 198, 291
COOPER, P. D.: Genetic analysis of animal viruses: new approaches and new vistas, 155
Cope, Z.: *Almroth Wright: founder of modern vaccine-therapy*, 103
CREAMER, B.: The turnover of the epithelium of the small intestine, 226
Crypt-cells of small intestine, 219
Cystinuria, 280
Cytosine, in nucleic acid of viruses, 161

D

DAWSON, A. M.: Absorption of fats, 247
Deoxyribonucleic acid of viruses, base doublet frequency patterns, 161
2,4-Dinitro-1-chlorobenzene, sensitivity to, histology, 37
Disaccharide, intestinal absorption, hereditary defects, 279
Dixon, F. J., jr & Humphrey, J. H. (editors): *Advances in immunology*, vol. 5, 102
DONIACH, D., *see* ROITT, I. M., 66
Doublet frequency patterns in nucleic acid of viruses, 161
DOWLING, R. H.: Compensatory changes in intestinal absorption, 275
DUMBELL, K. R., *see* BEDSON, H. S., 119
DUMONDE, D. C.: The role of the macrophage in delayed hypersensitivity, 9
DUTHIE, H. L.: Methods for studies of intestinal absorption in man, 213

E

Ectromelia virus, immune response, 61
Education: *The world of learning 1966–67*, 17th ed., 296
Electrolytes, hereditary disorders of intestinal absorption, 282
Enterochromaffin cells, 220
Enzymes, distribution in small intestine, 217
Exanthemata, genesis, 62

F

FAIRLEY, G. H., *see* ALEXANDER, P., 86
Fats, absorbed, route of transport, 250
—— intestinal absorption, 247
—— —— —— hereditary disorders, 281
Ferritin in intestinal mucosa, 263
Fibroma virus, immune response, 62
Finter, N. B. (editor): *Interferons*, 201
FISHER, R. B.: Absorption of proteins, 241
Folic acid, intestinal absorption, 260
—— —— synthesis by intestinal micro-organisms, 289
FRASER, K. B.: Defective and delayed myxovirus infections, 178
Freund's adjuvant, role in experimental autoallergic disease, 67
Fructose intolerance, 280

G

Galactose and glucose, malabsorption disease, 279
Gastroenterology: *Postgraduate gastroenterology*, 293
GELL, P. G. H.: Delayed hypersensitivity: specific cell-mediated immunity. Introduction to symposium, 1
—— & WOLSTENCROFT, R. A.: Delayed hypersensitivity and desensitization to chemical haptens: antigenic specificity of delayed hypersensitivity, 21
Genetics of animal viruses, 155
Glucose and galactose, malabsorption disease, 279
Goblet cells of small intestine and duodenal glands, 219
Gray, C. H. (editor): *Laboratory handbook of toxic agents*, 2nd ed., 103
Grist, N. R., Ross, C. A. C., Bell, E. J. & Stott, E.J.: *Diagnostic methods in clinical virology*, 202
Grossman, M. I. (editor): *Gastrin*, 294
Guanidine, antiviral activity, 115
Guanine, in nucleic acid of viruses, 161

H

Haemochromatosis, intestinal malabsorption in, 282
Haptens, desensitization to, 22
Harris, R. J. C. (editor): *Techniques in experimental virology*, 203
HART, P. D'ARCY & REES, R. J. W.: Lepromin and Kveim antigen reactivity in man, and their relation to tuberculin reactivity, 80
Hartnup disease, 280
Harvey: *The life of William Harvey*, 103
Heath, R. B. & Waterson, A. P. (editors): *Modern trends in medical virology*, vol. 1, 203
Hepatolenticular degeneration, intestinal malabsorption in, 282
Herpes simplex virus, immune response, 62
Hexoses, intestinal absorption, 231
Hill, A. B.: *Principles of medical statistics*, 8th ed., 104
HOLBOROW, E. J. & LOEWI, G.: Delayed hypersensitivity and polysaccharide-containing antigens, 72
Homograft reaction and cellular immunity, 55
HUMPHREY, J. H.: Cell-mediated immunity —general perspectives, 93
—— *see* Dixon, F. J., 102
Hydrophilic substances, intestinal absorption, 231
Hydroxybenzylbenzimidazole, antiviral activity, 115
Hypersensitivity, cellular, mechanisms, 11
—— delayed, and cytophilic antibodies, 15
—— —— and desensitization to haptens, 21
—— —— and polysaccharide-containing antigens, 72
—— —— antigenic specificity, 21
—— —— chronic reactions, 37
—— —— depression, antigen-mediated, 24
—— —— general perspectives, 93
—— —— histology, 35
—— —— in auto-immune disease, 66
—— —— Introduction to symposium, 1
—— —— ontogenic control, 32
—— —— passive transfer, 32
—— —— pharmacological mediators, 46
—— —— relationship to acquired cellular resistance, 52
—— —— role of adjuvants in production, 39
—— —— role of antibody, 30
—— —— role of macrophage, 9
—— —— suppression, 31
—— —— transfer, 9
—— induction, cytology of, 3

I

Immune deviation, 25
—— response, depression, antibody-mediated, 25
—— tolerance, simulation, 24
—— —— unresponsive states, 25
Immunity, specific cell-mediated: Introduction to symposium, 93
Immunoblasts, 4
Immunological diseases, 104
Immunology: *Advances in immunology*, vol. 5, 102
Immunosuppressive agents, 25, 57
Inflammation, allergic, histology, 35
Influenza virus, defective and delayed infection, 178
Interferon, antiviral effect, 117
—— biological significance, 113
—— in animals and man, 112
—— influence on viral multiplication, 109
—— mechanism of action, 111
—— production, 109, 110
—— properties, 109, 110
Interferons, 201
Intestine, absorption, compensatory changes in disease, 275
—— —— hereditary abnormalities, 279
—— —— inhibition, 270
—— —— Introduction to symposium, 205
—— —— measurement, 209
—— —— membrane transport, 231
—— —— metabolic inhibitors, 272
—— —— methods for studies, 213
—— —— quantitation, 210
—— —— radioisotopic scanning tests, 214
—— —— studies, markers for, 215
—— —— techniques, terminology and parameters in, 209
—— —— tolerance tests, 213
—— *Absorption from the intestine*, 294
—— epithelium, electrical changes in relation to transport, 266
—— flora, effect on cell turnover, 228
—— —— relationship to absorption, 285
—— malabsorption, abnormal micro-organisms as result of, 289
—— —— due to bacterial contamination, 287
—— mucosa, absorption studies, 215
—— small, cell turnover, 226
—— —— —— —— effect of disease, 229
—— —— cytochemistry, 217
—— —— epithelium, turnover, 226
—— —— histology, 217
—— —— resection, compensatory changes in absorption, 276
Intrinsic factor and intestinal absorption, 258
—— —— congenital deficiency, 283
Iododeoxyuridine, antiviral activity, 116
Iron, intestinal absorption, 263

J

Jejunum, surface epithelium, ultrastructure in idiopathic steatorrhoea, 223

K

Keynes, Sir G.: *The life of William Harvey*, 103
Knight, J., *see* Wolstenholme, G. E. W., 202
